

Daniel Gillett

25 Years, Information Technology

As a developer with strong programming and organizational skills I build and maintain websites working with either a design team integrating databases, or as the sole web developer. Whatever the purpose my passion is to turn the ideas of my clients into powerful websites applications that are easy to navigate and function smoothly. As a web technology enthusiast since the mid-nineties, my broad experience in Internet technology including the development and implementation of corporate marketing email campaigns is a valuable asset to companies large and small.

Career History

Web Developer & Small Business Services 1993 - 2019

Over the years I have developed blogging websites, painting and photo gallery websites and other service-based websites using Photoshop, Illustrator, and sometimes Adobe After Effects. On the development side of things I like to use Node Js along with some of its counterparts: Express server, React, MongoDB, and the various libraries that I may need. If it is a CMS that you need, and you don't want to develop one from scratch – Umbraco (Asp.Net and Angular) is my clear choice with its brilliant and intuitive out-of-the-box workflow features allowing for a very fast, seamless and professional website.

Director: Nico Tailored Therapies, Aug 2008 - 2019

NTT is a massage therapy company operating in three locations in the business district of London UK where it also provides on-site therapy at several London based corporations. I set up the limited company, e-commerce, developed the NTT Website, developed video training for staff, implemented an on-line booking system, developed an Access VBA middleware application to handle all of the admin and email marketing, as well designing our print media. As director I also managed payroll for five massage therapists.

Email Administrator & ISP Relations Manager, Aug 2007 – Jan 2008

Fleet Street Publications – responsible to manage, train, process and technically administer all email marketing efforts within Fleet Street Publications, in line with agreed plans set forth by the Email Marketing Manager, Legal Compliance and the Marketing department.

Tech. Project Manager & Systems Developer , Jul 2005 – Aug 2009

As technical lead for a division of CMP Information, a United Business Media with approximately 2000 employees worldwide, I was responsible for the central data operations department and developed the company-wide email campaign tool (Adestra's MessageFocus). As part of the rollout I devised expansion strategies and oversaw management of new projects and strategies involving teams of: DBAs, T-SQL Developers, Web/ASP Developers, VB Developers and Data Executives. Visual Basic (OOP) and SQL Server applications were the tools of the day which I maintained, upgrading existing SQL Server applications (T-SQL & MS Access) as needed.

Qualifications & Skills

asp.net c# node.js css javascript html
express react mongo db vba ms access
jquery sql server asp visual basic
razor ftp umbraco cms ms outlook
photoshop illustrator inDesign ms word
after effects premier ms excel ms project

Continued...

Data & Systems Developer, Transport for London, Mar 2002 – Sept 2004

Designed and built (GIS) system datasets from Ordnance Survey maps using Visual Basic, MapInfo, Map Basic and MS Access with automation tools for the online National Street Gazetteer management system – part of a three part solution plan, (the ‘Millennium Information System for Street works (MISS)’ to “Get London Moving”) on behalf of Transport for London. This entailed testing the accuracy of the datasets both manually and by creating testing queries using Visual Basic & Access.

Technical Support Agent, Psion Digital, London, Jul 2002 – Dec 2002

Psion was the designer and manufacturer of the first mobile handheld computers for commercial and industrial applications, headquartered in London. As a technical support agent I quickly learned of the problems and developed support solutions. Soon after I was hired I was given the responsibility for the Dutch, French and Nordic lines (without any language other than English).

Web Communications Manager, Canada, 1998 –2002

Exit 0 was a new business which evolved from Brooklyn North. My role changed hands when the company divided its products and most of the usual tasks leaving me to manage hands-on software and web development when necessary as well as email list management and software support.

Web Manager, Canada, 1993 – 1998

Pioneering in internet technology, Brooklyn North Software Works Inc., one of the earliest pioneers in web development technology and creator of the world’s first HTML Editor in the world! Brooklyn North was also the creator of the first ‘responsible’ email Broadcast tool. Brooklyn North was a start-up company which moved from basement to board-room status by making its first 1.8 Million (Profit) within the first 1.5 years in business.
